EDUCATION

Boston University | Boston, MA

Expected May 2022

Bachelor of Science in Computer Engineering

- GPA: 3.81/4.00
- Honors: Dean's List, Albert Shanker Scholarship

Relevant Coursework: Intro to Operating Systems

Cloud Computing

Intro to Machine Learning

Applied Algorithms

Intro to Software Engineering

Digital Logic Design

SKILLS

Programming: Python, C++, C, JavaScript, Java, HTML/CSS

Tools: Node.js, Express.js, Django, Flask, React.js, React Native, MongoDB, PostgreSQL, Firebase, Google Cloud Platform, Git

Spoken Languages: Chinese (Mandarin), English

WORK EXPERIENCE

Open Water Accelerator | New York, New York

June 2020 – Present

Software Engineer Intern

- Developed a cross-platform mobile App in **React Native** with **Firebase** database and authentication
- Implemented more than 33% of the App's core features with **Google Cloud** APIs integration

Gridology Education & Technology Inc. | New York, New York

May 2020 – Present

Software Engineer Intern

- Developed and maintained **RESTful** APIs in **Django**, updated APIs to streamline **PostgreSQL** migrations
- Designed and implemented multiple web crawler scripts to allow automatic database updates of over 1000 records. Reduced web crawler runtimes by 90%.

Hutyra Research Lab | Boston University

Feb 2020 – May 2020

Research Assistant

- Designed and built a web visualization platform to manage and visualize sensor data in real time
- Implemented **RESTful** APIs using **Node.js**, **Express**, **MongoDB** to provide user authentication and authorization for data management and access
- Developed real time visualization charts using Chart.js, Socket.io, **HTML/CSS**, Bootstrap 4, and jQuery

TECHNICAL PROJECTS

Burger Builder | Personal Project

July 2020

- Developed a real-time burger building web application using **React**, **Redux**, and **Firebase**

Yelp Camp | Personal Project

Jan 2020

- Developed a review forum web application for campgrounds
- Implemented RESTful routings, authentication and authorization by using **Node.js**, **Express**, **MongoDB**, **HTML**, **CSS**, and Bootstrap

Terrier Exchange | Boston University

Dec 2019

- Designed and developed an online marketplace Android app for Boston University students to buy, rent, and sell textbooks using **Android Studio** and **Java**
- Integrated backend using **Firebase** to provide user authentication, database, and storage
- Collaborated in a team of 5 to program in Android Studio using Java and resolved technical difficulties

LEADERSHIP & ACTIVITIES

Treasurer, **Global App Initiative** | Boston University

Sep 2019 – Present

Member, **Machine Intelligence Community** | Boston University

Sep 2019 – Present

Member, **Asian Student Union** | Boston University

Sep 2019 – Present
